

Water-Leak Sensor

The MSL01 is a wireless Water-Leak Sensor with Bluetooth® 5.0 technology that enables reliable monitoring of water damage. As soon as water touches the sensor contacts, an alarm is triggered and sent wirelessly to a gateway, such as the infsoft Locator Node Dongle. The data collected by the water leak sensor is immediately transmitted via the infsoft Locator Node Dongle to the infsoft LocAware platform®. The platform centrally processes and analyzes the data. Once the sensor detects a leak, an alarm message is automatically generated. This message is sent in real time to the building management system or to predefined contacts, for example, via push notifications or email.

KEY FEATURES

Accurate water detection for early leak warnings

IP67-certified probe for reliable operation in humid environments

Easy installation using adhesive pads or screws

Audible and visual alarm for quick leak identification

TECHNICAL SPECIFICATIONS

Dimensions: 70.6 mm x 38 mm x 17.8 mm; 1m (probe line length)

Weight: 65 g

Operating Temp.: 5°C to +50°C

Operating Humidity: 0% to 95% RH (non-condensing)

Battery: 2x AAA alkaline batteries (1300 mAh)

Certification: CE, FCC

OPERATION & INSTALLATION

Power On: Hold the button for 4 seconds until the blue LED and buzzer activate

Power Off: Press and hold the button for 4 seconds or turn off via app

Battery Replacement: Easily accessible for quick exchange

Water-Leak Alarm: LED stays on for 5 seconds, buzzer sounds every 5 seconds (3 cycles)

Mounting Options: Attach using double-sided adhesive tape or screws
