

E-Ink Display 2.9"

The 2.9" infsoft E-Ink Display is based on the Bluetooth Low Energy 5.0 technology and is ideally suited for compact, digital labeling and information display solutions. Utilizing advanced E-Ink display technology, it enables fully graphic content along with flexible and efficient content updates. A wide viewing angle of nearly 180° ensures excellent readability from various perspectives.

In office environments, the display offers a range of applications – from digital locker labels and equipment status indicators to dynamic room signage showing real-time occupancy and booking details. Integrated QR codes allow users to trigger service processes or access additional information with ease.
